#04
The Future of Asset Management

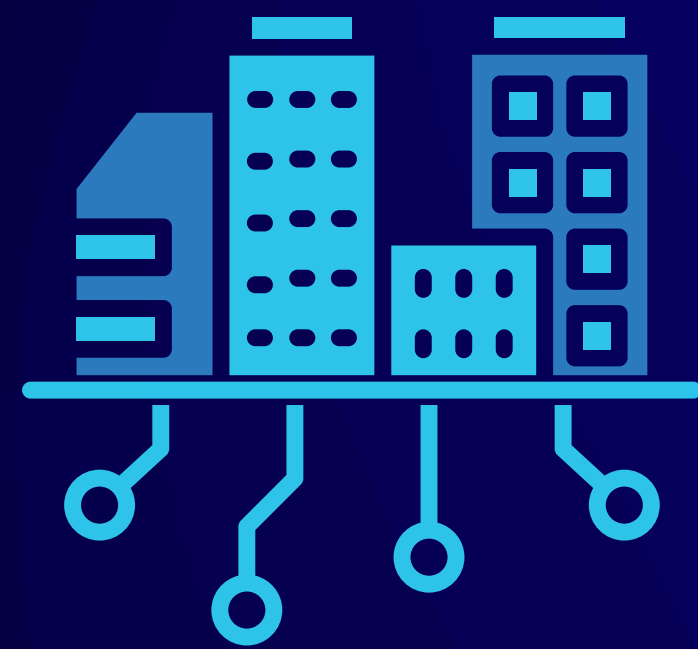

C&C GROUP

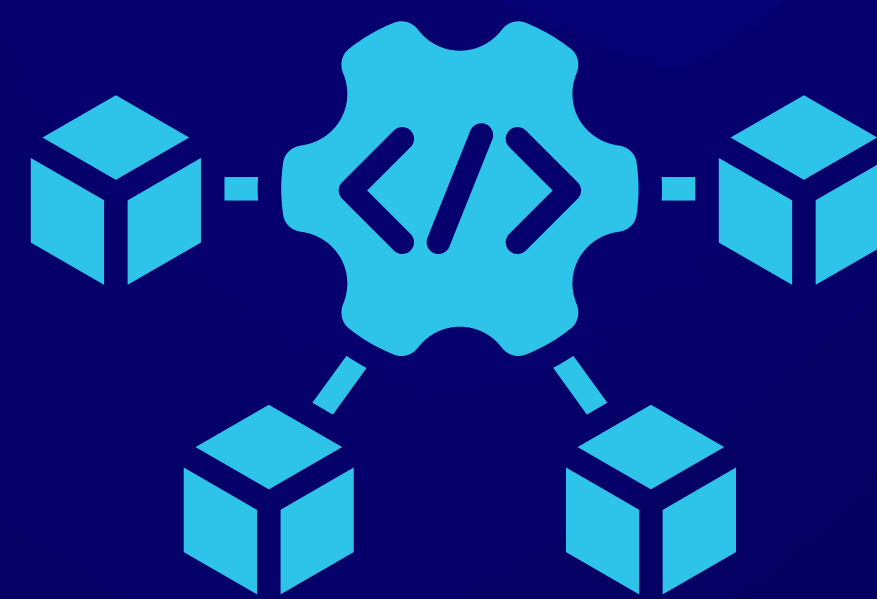

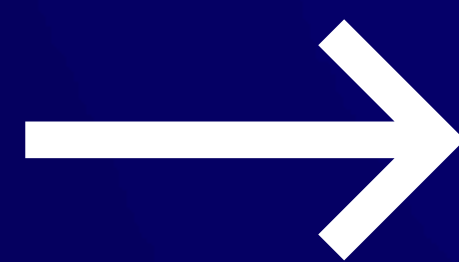

Asset Management Is Changing

Organisations don't need more asset data.

They need more confidence in it.

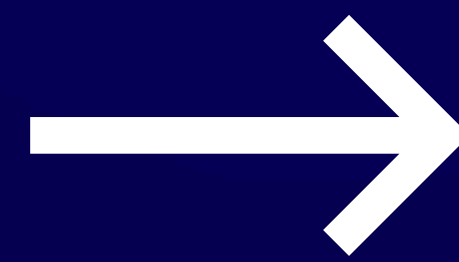

Ageing Infrastructure

Growing Data

Increasing Regulation

Better Decision
Making Required

Today's Challenges

Disconnected Information

Asset data spread across multiple systems.

Limited Visibility

Difficult to gain a complete picture.

Manual Processes

Too much time spent finding information.

Increasing Expectations

Regulation and investment decisions rely on trusted data.

C&C GROUP

What Leading Organisations Are Doing

Five simple points.

- Connecting asset information
- Improving data quality
- Standardising processes
- Increasing visibility
- Supporting better long-term planning

Better information creates better operational decisions.

The Future Of Asset Management

Isn't About More Data.

It's About Better Data.

How is your organisation preparing its asset information for the future?
