

INDUSTRY INSIGHT

Legacy Systems Are Costing More Than You Think

The biggest cost isn't maintaining the software.
It's maintaining the workarounds.

Legacy Systems Are Costing More Than You Think

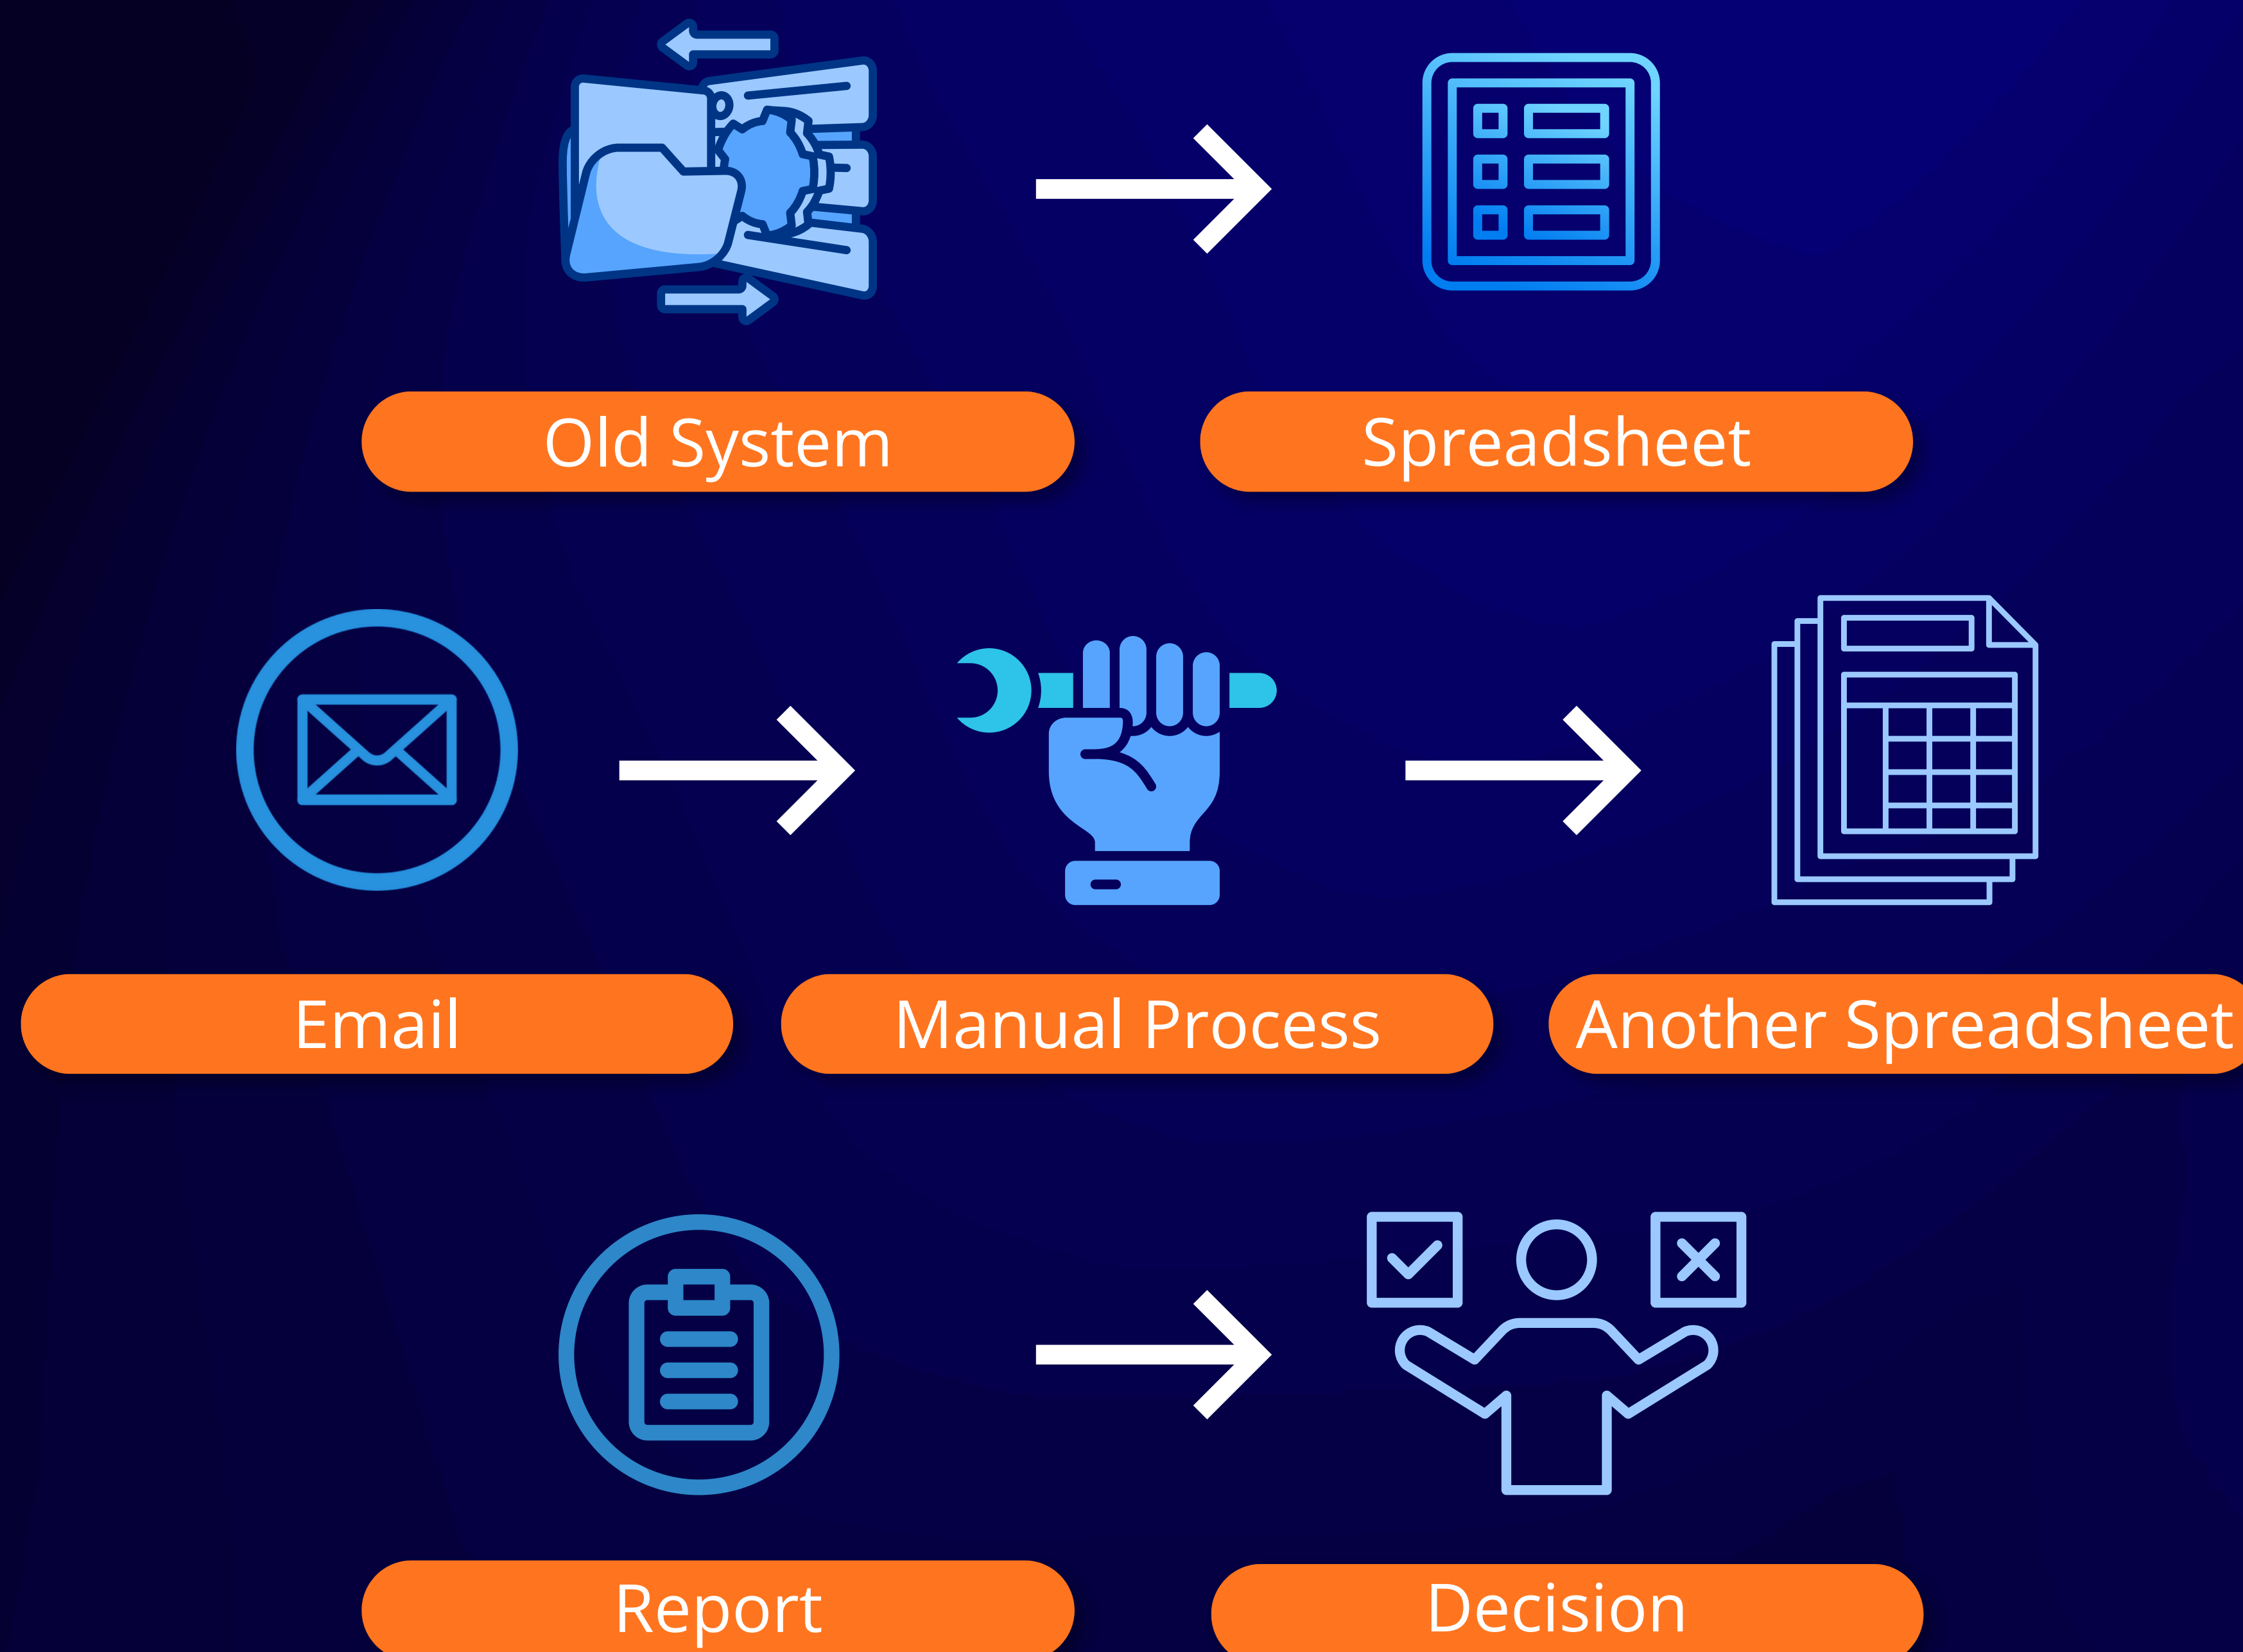

C&C GROUP

The Hidden Reality

Most organisations don't notice legacy systems becoming a problem.

They notice the growing number of workarounds.

Every extra step introduces another opportunity for delay or error.

The Hidden Costs

Lost Productivity

Teams spend hours completing tasks that should be automated.

Limited Visibility

Data becomes fragmented across disconnected systems.

Operational Risk

Manual intervention increases the potential for errors

Slower Innovation

Modern technologies become harder to implement.

C&C GROUP

What Leading Organisations Are Doing

Five simple points.

- Connecting systems instead of replacing everything overnight
- Removing repetitive manual processes
- Improving data visibility
- Building scalable digital platforms
- Creating a trusted foundation for future innovation

Digital transformation doesn't always start with replacing systems.
It starts with improving the way they work together.

Where do legacy processes create the biggest challenges in your organisation?

Legacy technology isn't always the problem.

Legacy processes usually are.

Modernisation isn't about replacing everything.
It's about enabling people to work more effectively.
